

## Insurance

### Why take the risk? Insure your laptop against the unexpected.

Laptops are exposed to many risks whether used at the office or during business trips and most accidents occur when least expected. Take care of incidents that aren't covered by the Standard Warranty and insure your assets against accidental damages.

With the Accidental Damage Insurance you don't need to worry about high repair costs, the detrimental effects of unplanned disruption and the inconvenience of finding a replacement unit. It covers the repair or replacement of your assets and gives you access to instant support. This means: no unexpected costs for you as well as a quick return to productivity.

For even more protection choose the Accidental Damage & Theft Insurance and be covered, in case the worst should happen. Simply choose the level of insurance that's right for you.
